

**2015 PROVISIONAL COMPLIANCE MONITORING REPORT  
(COVERING 2014 ACTIVITIES)  
Executive Summary**

**I. INTRODUCTION**

1. TCC11 undertook its fifth annual review of compliance by CCMs against a priority list of Commission obligations agreed to at WCPFC11. (Att U to WCPFC11 Summary Report)
2. TCC11 has provisionally determined that the following CCMs are considered to be “Compliant” under the provisions of CMM 2014-07: Cook Islands, Mexico, New Caledonia, Nauru and Vietnam.
3. TCC11 has provisionally determined that the following CCMs are considered to be “Non-Compliant” under the provisions of CMM 2014-07: Australia, Canada, China, Ecuador, European Union, Fiji, Federated States of Micronesia, France, Indonesia, Japan, Kiribati, Republic of Korea, Marshall Islands, Niue, New Zealand, Panama, French Polynesia, Papua New Guinea, Philippines, Palau, Solomon Islands, El Salvador, Thailand, Tokelau, Tonga, Tuvalu, Chinese Taipei, United States of America, Vanuatu, Wallis and Futuna, and Samoa.

**II. DEVELOPMENT OF THE PROVISIONAL COMPLIANCE MONITORING REPORT BY TCC11**

4. TCC11 reviewed the draft Compliance Monitoring Report (draft CMR) for 36 CCMs in a closed working group session. The draft CMR is classified as non-public domain data as a number of CCMs were not able to agree to release their non-public domain data, therefore the decision was made to close the session.
5. TCC11 agreed to conduct the compliance review process in accordance with the agreed principles articulated in WCPFC-TCC11-2015-23 rev 1.
6. The tier scoring system adopted by WCPFC11 assisted in evaluating the compliance of CCMs for the provision of scientific data and TCC11 concluded that it was very useful and informative tool.
7. TCC11 notes that the Provisional CMR provides its provisional compliance assessment and it is submitting this report to the Commission for its consideration and final assessment.

**III. ISSUES ARISING DURING THE COMPLIANCE REVIEW PROCESS**

*CMM 2007-01, Para 14(vii); CMM 2013-01, para 14; and CMM 2013-01, Para 16*

8. TCC11 encountered difficulty in assessing the obligations in CMM 2007-01, Para 14(vii); CMM 2013-01, para 14; and CMM 2013-01, Para 16. A number of significant issues were raised by both flag states and coastal states.
9. TCC11 reached a compromise for progressing the issue during this year’s assessment; however, many CCMs remained uncomfortable with the agreed way forward. TCC11 note that this reflects a change to the way these obligations have previously been assessed.
10. TCC11 agreed that CCMs would be assessed as Compliant against these obligations if they were

able to provide details indicating that a good faith effort had been made to investigate the alleged violations. However, many CCMs noted that most of the reports of investigations fell far short of what would be considered a full investigation, and would be considering any relevant CCMs actions between TCC11 and WCPFC12 when assessing the final compliance status.

11. TCC11 agreed that the provisional CMR would clearly note the concerns raised with the agreed approach. The following issues were noted:

- a. CCMs take allegations of violations involving observer harassment or interference very seriously;
- b. CCMs consider the annual FAD closure to be a central part of the Tropical Tunas measure;
- c. The revised CMS CMM must include a mechanism that requires CCMs to report back annually on the progress of these investigations until they are resolved;
- d. The Commission must prioritize finding a resolution to facilitate the process for flag states to obtain observer reports relating to alleged violations in a timely manner;
- e. Any solution must include the commitment of both flag states and coastal states that provide observers to collaborate to improve this process;
- f. If the allegations of a violation come from an observer report, any investigation into those violations must include, at a minimum, review of that report;
- g. CCMs noted that a full investigation is the first step and what is most critical is that CCMs address any violations that are found; and
- h. Coastal states shall receive notification of alleged violations occurring in their waters.

12. TCC11 agreed that the agreed process this year was only accepted on the basis that this does not set a precedent for how these obligations will be assessed in the future.

13. TCC11 identified three recommendations to assist in improving this issue in the future.

**14. TCC11 recommends that WCPFC12 prioritize finding a resolution to facilitate the process for flag states to obtain observer reports relating to alleged infringements in a timely manner, noting that any solution must include the commitment of both flag states and coastal states as well as observer providers to collaborate to improve this process. It is the responsibility of all CCMs to work together on this issue as a priority.**

**15. As an initial response to the recommendation in paragraph 13, TCC11 recommends that WCPFC12 adopt IWG-ROP4's recommendations in paragraphs 28 – 31 of the IWG-ROP4 Summary Report to establish a "pre-notification process from observer providers to flag CCMs of possible alleged infringements by their vessels."**

**16. TCC11 recommends that WCPFC12 encourage the Secretariat to continue its work developing the Secretariat's compliance case file system on the IMS, which would allow the Secretariat to track the alleged infringements reported by observers as Article 25(2) matters.**

17. TCC11 was pleased to note that there has been significant progress in the provision operational level catch and effort data by two CCMs. However, there continues to be a significant difference of interpretation as to whether the obligation contained in paragraph 03 (Operational level catch and effort data) of the Scientific Data to be Provided to the Commission is met by providing aggregated catch and effort data and size composition data, as described in paragraphs

04 and 05 of the Scientific Data to be Provided to the Commission.

18. As a result, TCC11 was again unable to assess this obligation. However, TCC11 notes that additional progress in this area is expected in 2016.

19. In conducting its assessment of CMM 2013-01, para 40, TCC11 noted that a majority of CCMs identified one CCM as Priority Non-Compliant against this obligation, while a minority of CCMs believed that the CCM should be assessed as Compliant. The majority view was that despite the fact the CCM had adjusted its annual Bigeye Tuna quota for 2015, to reflect the overage in 2014, the CCM remained Priority Non-Compliant due to the overage. The minority view was that paragraph 40 allows for the adjustment of the following year's quota and thus if the CCM has made that adjustment, it should be assessed as Compliant.

20. Consistent with the 2012, 2013 and 2014 Final Compliance Monitoring Report, CCMs evaluated as "non-compliant" are strongly encouraged to address their implementation issues even without a response procedure.

21. TCC11 agreed not to assess the following paragraphs: CMM 2007-01 paragraph 8, CMM 2007-01, Att K, Annex C, paragraph 4; CMM 2013-01, paragraph 28; Section 03 of the Scientific Data Requirements (as noted above); and Section 07 of the Scientific Data Requirements.

## V. REQUESTS FOR ASSISTANCE AND CAPACITY BUILDING

26. Several areas were identified where targeted assistance is required to assist SIDS and other CCMs in implementing specific obligations.

CMM	CMM paragraph	CCM
2007-01		Indonesia
2007-01	Att. K Annex C para 06	Kiribati, FSM, Vanuatu
2009-06		Kiribati, Vanuatu
2011-02 (2014-02)	9a	Indonesia
	9a VMS SSPs 7.2.2	Tuvalu
2013-01 (2014-01)	24, 44, 47, 48, 49	Indonesia

	<b>Scientific Data<sup>3</sup></b>				
<i>Section 01 – Estimate of Annual Catches<sup>2</sup></i>	Australia, Canada, Cook Islands, Ecuador, El Salvador, European Union, Federated States of Micronesia, Fiji, French Polynesia, Japan, Kiribati, Korea, Marshall Islands, New Caledonia, New Zealand, Papua New Guinea, Philippines, Samoa, Solomon Islands, Chinese Taipei, Tokelau, Tonga, Tuvalu, United States, Vanuatu		China [Tier II: 77%], Indonesia [Tier II: 69%]	China (2), Indonesia (3)	

<sup>3</sup> The references in columns “Non-Compliant” and “Priority Non-Compliant” are based on the tiered scoring system used in the following document: *Scientific Data to be Provided to the Commission* (WCPFC-TCC11-2015-IP04 dated 17 August 2015), however, the percentages shown are the latest as provided by SPC to TCC11 (as at 25 Sept 2015).

Tier I: No data are provided, or data have been provided but they have been evaluated as ‘unusable’ (instances where none of the data provided can be used in assessments). This level of data gap is the most severe and has by far the greatest impacts on the scientific work of the Commission.

Tier II: Data have been provided, most of which can be used for the scientific work of the Commission, but (i) there are one or several (minimum-standard) data fields not provided and/or (ii) the coverage of the data is not according to the requirements. In these cases, some of the scientific work of the Commission cannot be undertaken. The % value assigned in this category represents the estimated proportion of the key attribute data provided compared to the full set of key attribute data required as stipulated in the WCPFC data submission guidelines.
